Passionate Flutter developer with a strong foundation in building mobile applications for Android and iOS. Interested in web development using HTML, CSS, JavaScript, and React.

Committed to improving problem-solving skills through platforms like **Leetcode** and **HackerRank**. Eager to apply technical knowledge and contribute to impactful projects as a developer.

Education

GLS University, Bachelor of Computer Application

June 2021 – Apr 2024

- **CGPA:** 8.1/10.0
- **Coursework:** Computer Architecture, Comparison of Learning Algorithms, Object-Oriented Programming, Computational Theory,

Projects

ShopSizzle

- I developed an e-commerce app using the Flutter framework. The project utilizes the Provider state management system, integrating **Firestore for both authentication (with Google sign-in) and database management**.
- The project includes features such as **complete shopping cart functionality, integrated with Razorpay for secure payments**, taking advantage of Firebase's real-time capabilities and ensuring efficient data handling.
- **Tools Used:** C++, Dart, Flutter, Firebase, Razorpay

Weather app

- The Weather App is a Flutter-based project that provides users with **real-time weather updates using a reliable weather API. With state management handled through Provider**, the app ensures smooth data flow and performance. It offers an intuitive and visually appealing user interface, designed with best UI/UX practices in mind to enhance the user experience.
- **Tools Used:** C++, Dart, Flutter, Firebase

Digital Scrapbook

- The Digital Scrapbook is a complete Android application **that enables photographers to create profiles, showcase their portfolios, and display their work**. Users in need of photographers can browse through profiles, hire them, and make payments directly through the app. This is my Collage Project.
- **Tools Used:** Android(Java), PHP, MySQL

Technologies

Computer Science Fundamentals: Data Structures and Algorithms, Database Management Systems, Computer Networks, mobile developer, ios, android, Operating Systems, Object-Oriented Programming

Languages: Dart, JavaScript, HTML, CSS, Java, C++, C, PHP, Python,

Frameworks/Libraries: Flutter, React.JS, TailwindCSS, Bootstrap

Databases: SQLite, MySQL

Additional Tools: Git, Github, Firebase, Linux, Shell Script, Architecture(**Clean**), Figma, Canva, Basic of Blockchain

Experience

FREELANCE | MOBILE APPLICATION DEVELOPER

Successfully executed and delivered multiple client projects, showcasing adaptability, effective communication, and delivered **exceptional results within specified timelines**.
